01 PROFILE

I am a dynamic and creative junior software developer and an ambitious problem solver with a passion for computer science. I have a good understanding of technology trends and developments and I know to apply my programming skills to solve complex challenges.

On a personal level I have the strong listening skills needed to acquire and comprehend user requirements and I think I more than competent on independently working on most phases of development activities.

As someone who takes responsibility for his own personal development, I am continually evaluating and upgrading my skills
